In this Art Workshop, internationally renowned artist, Sterling Edwards, will show you how to create a watercolor painting that stands out from the crowd. Intended for the intermediate to advanced student, the class will cover a wide variety of watercolor techniques and subjects. Learn how to create energy in your painting with a balance of positive and negative shapes, how to build rich values, save white paper, and how to use expressive color and stylized shapes, just to name a few. You'll also learn many ways to create drama in your paintings with expressive brushwork and balancing hard and soft edges. If you're ready to take your painting to new levels and push the boundaries of your creative side, then this is one workshop that you won't want to miss. See for yourself why Sterling Edwards is one of the most sought after workshop instructors in the U.S.

Sterling Edwards is an award winning contemporary watermedia master. He has been teaching national and international painting workshops for the past 15 years and holds signature status in the Canadian Society of Painters in Watercolour and in the Transparent Watercolor Society of America. He was featured in the fall 2001 issue of "Watercolor Magic Magazine's Ones to Watch" and in "Best of America Watermedia Artists", as well as numerous other publications. Sterling is the author of the best-selling book *Creating Luminous Watercolor Landscapes, a Four Step Process* and is a contributing artist in six other books. In 2013, Sterling was accepted by invitation into the International Watercolor Society. In addition, he is often commissioned to jury national and international art competitions, and his paintings are collected worldwide.

Learning to simplify and avoid overworking are the goals of this class. Charles uses the same approach for figures, still life, and landscapes. First you'll use contour drawing to help you concentrate on interconnecting shapes rather than on individual isolated objects. Next you'll practice "Direct Painting", using as few over washes as possible. Concentrate on good paint consistency (the correct ratio of water and paint when the brush is loaded.) Your goal will be to achieve the correct color, edge variety, and tonal value with your first try. It's strongly advised that before the workshop, each student review: "Painting Flowers in Watercolor", "Charles Reid's Watercolor Secrets", and the recent "Charles Reid's Watercolor Solutions".

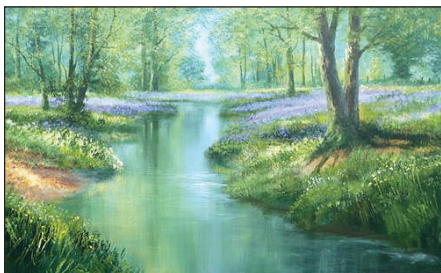

Charles Reid has long been considered a master of watercolor. He was born in Cambridge, New York, and studied art at the University of Vermont and the Art Students League of New York. He has won numerous awards, including the Childe Hassam Purchase Prize at the American Academy of Arts and Letters, the National Academy of Design and the American Watercolor Society. In 1980 he was elected to the National Academy of Design. Public collections of his work include Smith College, Yellowstone Art Center, Brigham Young College, Roche Corporation, and the National Academy of Design. In addition to painting, Reid teaches workshops around the world. He has written eleven books on painting in watercolor and oil.

Fealing Lin combines semi-abstract strokes and impressionistic concepts to elicit life and movement in her portrait and figure paintings. Discover the spontaneity and uniqueness of watercolor as you learn how value and temperature adjust when the planes of the face change, as well as to use transparent glazing to allow the glow of the paper to shine through. By balancing colors and weaving lights and darks, you will achieve painterly and successful portraits.

Fealing Lin, based in Los Angeles, is a popular workshop instructor in the US and Canada. She is a signature member of the National Watercolor Society, Transparent Watercolor Society of America, Watercolor West, and many others. Her work has won numerous awards in national and international shows. Fealing has been published in many books and magazines, including *Watercolor Magic*, *Watercolor Artist*, *International Artist*, and *Splash* (volumes 9, 10, 11, 12 and 14). Lin is one of 15 artists who contributed to *Watercolor Secrets* (North Light Books, 2009) which features her self-portrait on the cover.

Through the language of watercolor, explore the world around you in fresh, exciting and personal ways. The lessons in Don's workshop are geared to a better understanding of that personal exploration. Each day, Don will stress a major visual concern; light, color, granulation, organizing nature and utilizing negative space are just a few subjects to be addressed. The class isn't geared to any specific level of achievement; rather artists at all levels will benefit from a more intimate understanding of the painting possibilities available in the exciting world of landscape painting. This workshop will be packed with demonstrations, discussions, individual help, personal and group critiques.

Don once received second honorable mention in the Black Water county art fair and 4-H club extravaganza. He has taught workshops in all fifty-three states as well as North Korea and Realmessistan. Don and Skeeter Davis once started a beautiful landscape painting on the side of the Beauregard County water tower, though it was never finished due to a lack of art appreciation from the local county sheriff. When asked to describe Don's teaching ability at a Cheap Joe's workshop, student Louis Rizzo used several descriptive \*!\* words. Don's book based on his workshop travels, "Rough Sketches", has to date sold literally tens of copies. But seriously, if you like to have fun while you're learning a ton, Don's workshop is just for you. Don Andrews is a nationally known watercolor artist and workshop instructor. He is a graduate of Ringling School of Art in Florida and a resident of Austin, TX. Don is an active member and past board director of the American Watercolor Society. His paintings have received numerous awards in national watercolor competitions, including three awards from the American Watercolor Society.

Think backward into a work of art! This watercolor workshop involves the “Atelier” approach which goes back to a concentrated method derived from teaching practices begun in the late middle ages and the renaissance. You’ll learn how to really look at an object, its situation, and how to abstract and simplify the visible world. The dramatic use of light and color, line, texture, and chiaroscuro are focused upon as tools. Secrets of classical design will be revealed to result in a strong painting. Toward the end of the class, these principles will be put to the test in the form of the student’s own work. John shares his unique approach to painting, and he introduces the work of artists from the past, with the objective of showing their color and design principles. Moreover, each student receives personal, focused instruction. Students not only learn to paint, but also, are introduced to Art History.

John Wilkison graduated from Vanderbilt University with a Masters Degree in Painting and Studio. He has been working in watercolor since 1970. His paintings have been shown at the Montgomery Museum of Art in Alabama, The Museum of the Southwest in Midland, Texas, and the Tennessee State Museum. He is a Signature member of the American Watercolor Society, the National Watercolor Society, the Southern Watercolor Society, and the Tennessee Watercolor Society. His works are in private, public, and museum collections.

David will be teaching you watercolor from beginning to end, starting with teaching you how to take total control of the watercolor medium and learning to use that control to create well composed watercolors. Subject matter will be changing every day with a photo reference supplied in the morning, and switching to your reference photo in the afternoon. Lessons will include: loosen up your watercolor technique, adding life/people into your paintings, controlling your wet-into-wet watercolor washes, city scenes simplified, and reflections in water. David’s goal is to teach students to concur the medium of watercolor and he takes great pride in making sure that every student leaves with the ability to control.

David has been teaching watercolor since leaving the American Academy of Art in 1983. He has taught across the US and Europe. For over 30 years, David worked as a storyboard illustrator for a major advertising agency, but always used his vacation time to teach workshops and weekly classes. In 2014 he focused his attention on his fine art teachings, and is now doing workshops full time due to the popular demand of his teaching style. David is the author of WATER-COLOR COMPOSITION MADE EASY, and HOW TO SKETCH WITH WATERCOLOR. He has had two different articles published in “International Artist” magazine and in “Watercolor Magic”, as well as publishing a weekly newsletter on Pinterest and producing YouTube videos.

This art workshop will feature the many dimensions of the excitingly vivid, versatile, and non-toxic medium of Colored Pencils. With plenty of studio demonstrations and access to a generous supply of sample materials, you will explore a wide range of colored pencils and enhancing techniques, and learn to apply them to your “paintings”. Kristy will demonstrate color-layering, line impression, texturizing, burnishing, buffing, heat techniques, color-lifting, highlighting, blending, and much more. A wide range of surfaces will also be introduced: Bristol board, Stonehenge paper, sanded colored pastel papers, multi-medium art boards, and watercolor papers. Wax and oil-based “traditional” colored pencils will initially be used, but you will learn to also use watercolor pencils and water-soluble wax pastels. Kristy tailors her instruction to beginners and accomplished artists alike.

Kristy is a graduate of Purdue University, with both bachelor’s and master’s degrees in education, as well as a life license in teaching. She has taught over 200 drawing workshops nationwide for students of all ages. Her educational style is friendly, relaxed, enthusiastic, and supportive of the individual student’s uniquely personal style. Just as a cheetah is able to focus on one single zebra in a stampeding blur of stripes and dust, artists must learn to focus their artistic vision and decision-making on selected parts of their subject to the exclusion of everything else. Watercolors are mostly about emotion. By working the middle values, you guide the viewer's eye to where you want it to go, increasing the emotional impact and depth. In this workshop, David Rankin will train you in his Observation & Evaluation Skills for correct color values, in how to build a better illusion of spatial depth by using one of 6 different painting recipes for placing the darkest darks in your paintings, and in how to create masterful middle values for maximum emotional impact.

David's award-winning watercolors in public and private collections in the US and India, have been featured in more than 125 museum exhibitions, are included in the North Light's series— Splash: The Best of Watercolor, and Strokes of Genius: The Best of Drawing, and in numerous art magazines. He promotes conservation and appreciation of the natural world through his paintings, and has served on the board of the Society of Animal Artists since 1990, having won their top award 4 times. David is one of the true modern-day masters of transparent watercolor, exuding a dynamic passion for the medium in his lectures, demonstrations, and workshop instruction. His art reflects his profound passion for both watercolor and nature, as he feels a connection with the subjects he paints.

# Welcome to the 2017 Edition of Cheap Joe's Global Workshopper

It is amazing how taking a workshop can help take our art to the next level—I have taken many and appreciate all that I have learned from them and the many friends I have made in each class. It is one of the best gifts I have ever given to myself and my art. I could name lots more artists who have taken many workshops. I can name professional artists who regularly attend workshops. If you ask them why you might be surprised at their answers. “It keeps us young” - “It’s entertaining us while we learn” - “I wanted to jump start my art and it did.” I could go on and on. Each listing that follows includes the sponsoring organization in red, the instructors name, date, class level, location, and contact information. Enjoy! **Joe**

## ARRANGING YOUR PAINTING SPACE CORRECTLY

If you are right handed, you will have your palette, water, blotter and brushes to the RIGHT of your paper. On your left will be your sketch, photos, pencils, eraser, etc. For those of you that are left handed, the palette will be on your left as well as the water, blotter and brushes. On your right will be your sketch, photos, pencils, eraser, etc. Sounds simple? It is simple & very important. After a few paintings under your belt you will understand why.
