## Gamblin Artists' Oil Colors

Working closely with conservation scientists, Robert Gamblin's Oil Colors use only pure lightfast pigments and alkali-refined linseed oil. The first thing you'll notice is a more granular consistency as each pigment is milled the same number of times, which some artists prefer, because it allows each pigment to retain its individual characteristic - a quality sought after by many traditionalists.

Available in 37 ml. and select 150 ml. tubes.

We promise to always move painting forward while being kind to you, our team, and the planet we share. If there's a better way, we'll find it. Always forward. Together.

### Watercolor Paper Easy Blocks

Fluid watercolor paper is meticulously crafted in small batches at lower speeds for better quality and to match the integrity of expensive mouldmade papers. Available in 22" x 30" sheets and blocks. The **Easy Blocks** are interesting because they're only glued on two sides instead of the traditional four. Theory is that the two edge-glue reduces the threat of tear at separation time. And, there really is not an increase in buckling or warping, at least that we can tell. The paper stays flat and doesn't twist or curl! Once your painting is dry, the top sheet easily separates by sliding a dull knife or dull letter opener under the top sheet revealing a fresh sheet beneath. 15 sheets of 140 lb. cold pressed, Acid-Free watercolor paper per block.

## Raphael Textura Synthetic D Brushes

The tufts of these brushes are shaped like the letter "D" and are made with Raphael's best synthetic fibers for oil and acrylic. With a soft side along one edge of the tuft, and a flat and springy side along the other, these brushes work well for making sharp marks, working with thick colors, and blending, smoothing, and dry brush textures. An unusual ferrule crimped only on one side makes this unique shape possible.

## Miller's Pseudo Sable Long Handled

The tuft of these fine brushes perfectly mimic the characteristics of a brush constructed with real sable. The variety of diameters of nylon hair used has been molded and shaped to hold a ton of color. For those that are environmentally conscious, no animals were harmed in the making of these brushes and the wood for the handles come from responsibly managed forests. We've had great success with the short-handled counterpart, so give it a try for acrylic & oil use and be prepared to be amazed.
